

Dear Sir or Madam, I am a subscriber to XM Satellite Radio and understand that there is an issue before you to curtail their offering of services that I pay for on a monthly basis. If I did not want or believe in the service they offer, be assured that I would not be giving them my money if I was able to get the same level of quality and delivery for free. Please do not restrict the offering they currently have because a bunch of behind the times radio and TV people can't make the jump into the 21st century technology. I urge you to reject the NAB's petition 04-160 and let those who pay for these premium services enjoy what we pay for with out any hinderance within the laws as they are.

Sincerely,

David C. O'Brien
